EXPERIENCE

Tayari —Software *Development*

November 2020 – Present

I am currently working as a front end developer. Currently I am using react native to accomplish the tasks I have.

Kanzu Code (Under Refactory) Uganda —Software *Development*

October 2019 – March 2020

I developed an educative game as a mobile application that can be used by both children and adults. This application was developed using React Native.

During my time at Kanzu code, I learnt how to put in practice agile methodologies like daily stand-ups, testing software, sprint planning and sprint reviews. I also learnt how to work remotely and work with version control.

SocBox Digital Marketing— Digital Marketing Intern

May 2019

Managed and developed multi- media content for various clients' websites and social media platforms.

I was tasked to understand what the client would want to be marketed and thereafter, I created content and planned for when and where the content would be posted.

MTNUganda — *IT Intern*

June 2018 – August 2018

I worked with various teams in the IT department and I was able to learn how to do various tasks by the end of my internships.

At the end user support desk, I helped the internal clients fix any issues that would arise, like a computer failing to start, updating software and resolving tickets. At the IT support desk, I installed various operating systems on various machines, helped fix jammed printers and any other technical issues that would arise. I monitored the mobile money rates in various districts and was able to identify if there was any issue and what issue it was exactly.

Greenhill Academy Kibuli, Uganda — *Teaching Assistant*

January 2016 – May 2016

I organized teachers work plans and helped the children with the assigned tasks. I interacted with the children and was able to let parents know their children's progress through the day.
